

landlogic

Software Installation Instructions

Single Computer

1. Download the software by following the link in the email we sent you.
2. When prompted select the 'SAVE' option and save the file to a folder on your hard drive. *Do not change the name of the file.*
3. Navigate to the folder where you stored the file and click on it. You will be prompted to extract the contents of the file to a location on your computer.
4. Select any local hard drive, usually the C drive.
5. Navigate to the newly installed folder, usually 'Landlogic' followed by the version number and right click on the file 'Landlogic.exe'
6. Select 'Send to Desktop' from the menu to place a shortcut on your Desktop

Network Installation

1. Follow steps 1-3 above
2. Install the software on the server in a location that is accessible to all the users who will be running the software.
3. Create a shortcut to software.
4. Distribute the shortcut to your users. The software runs directly from the server, you do not install local copies on the client machines.

Software Registration

1. The first time the software is run you must complete the electronic registration form which requires internet access from the computer registering the software.
2. After registering, sign on to the software as ADMINISTRATOR and create a PIN, or leave it blank, which is the default. Do not forget the PIN you created for the ADMINISTRATOR account.
3. Additional users can be added by selecting the PERSONNEL button underneath the SYSTEM SETUP option.
